Profile Summary

A Passionate and Innovative Software Engineer and enthusiastic Software Security individual with years of extensive experience in developing high-end, Fullstack, Mobile, Blockchain and AI Solutions. Also, with keen attention to Technical Leadership, Project Management, Cybersecurity and Research. A Consistent Learner with adaptability skills, Problem Solving and Cross functional Team Collaboration.

Experience

MOBILE & AI ENGINEER, PRIMSTACK - Developed Seamless Cross Platform Application for IOS and Android Devices. - Implemented AI search and Recommendation for users on PLACES App - Implementated Safe and High level Data Encryption	12/2025 – 06/2026 United Kingdom
PROJECT DEVELOPMENT EXECUTIVE, SAYS ENERGY SERVICES - Worked on project documentations, ideation and brainstorming with Project development team. - Did Extensive Research in the Oil and Gas Field	10/2025 – 06/2026 Lagos, Nigeria
BACKEND & AI ENGINEER, NITEON  - Collaborated with design and backend teams to refine UI workflows and data flows. - Integrated AI-powered product suggestions and chat interfaces into existing UIs using efficient state management. - Fixed existing system bugs that help the user experience by 50% - Built an AI recommendation system for recommending products and have conversations with users. - Ensured Payments are secured. - Designed algorithms to optimize performance of artificial intelligence implementation. - Optimized codebase for improved scalability and efficiency of automated processes.	06/2025 – 12/2025 Colorado, USA
BLOCKCHAIN & MOBILE ENGINEER, TRASHCOIN  - Developed mobile application that allows for cryptocurrency transactions and wallet management. - Implemented user interface designs for seamless user experiences across devices. - Implemented dashboards and transaction tables using React, TypeScript, and Tailwind CSS. - Integrated blockchain technology into mobile platforms for secure transactions. - Integrated third-party APIs into existing mobile products. - Built a custom token for transactions using Solana blockchain using Rust. - Improved and Implemented features on the mobile application to reduce latency and improve smooth operations and load time.	08/2024 – 04/2025 City of Dover, USA
FULLSTACK & AI ENGINEER, CENTURY INFORMATION SYSTEMS  - Modified existing Application features and Integration of AI for Text-to-Speech(TTS) - Redesign and Implemented new UI features. - Implemented APIs to enhance the functionality of existing systems.	01/2025 – 07/2025 Abuja, Nigeria

- Optimized frontend performance by implementing caching strategies such as Redis.

MOBILE ENGINEER, AFRICARTZ

11/2024 – 05/2025

Lagos, Nigeria

- Developed the Africartz mobile Application for cross platform.
- Enhanced basic features and worked with UI.
- Made seamless user experience for the application.
- Conducted code reviews to ensure quality and adherence to best practices.
- Researched emerging technologies to improve mobile application capabilities continuously.

FULLSTACK & BLOCKCHAIN, RSC BYTE

11/2023 – 05/2025

Abuja, Nigeria

- Developed and maintained reusable UI components for web and mobile platforms.
- Collaborated on responsive layouts, improving load speed by 35%.
- Created seamless mobile applications compatible with various platforms
- Engineered web applications incorporating advanced AI features.
- Troubleshoot and resolved technical issues in existing mobile and web applications promptly.
- Developed smart contracts using Solidity for a multi-level Reward System.
- Tested and debugged blockchain-based applications to ensure quality assurance.
- Developed strategies to increase transaction throughputs by optimizing codebases.
- Participated in open source communities such as (Polygon Guild, Arbitrum Stylus).

FULLSTACK & MOBILE ENGINEER, ELC NIGERIA

03/2024 – 04/2025

Abuja, Nigeria

- Modernized codebases to improve functionality of real estate web and mobile application.
- Coordinated testing and validation procedures through software development lifecycle.
- Provided technical expertise to other team members regarding the design and development of mobile applications.
- Implemented new features that boosted user satisfaction by 20%.
- Conducted weekly research to enhance application credibility and value.
- Resolved bugs across various applications to ensure optimal performance.

MOBILE ENGINEER | CONTRACT, EDSQILL

03/2024 – 12/2024

Abuja, Nigeria

- Enhanced functionality of mobile applications to improve user experience.
- Revamped existing user interface of mobile application for better engagement.
- Resolved bugs and integrated new features for effective course learning.
- Optimized app performance to ensure faster load times and responsiveness.

FRONTEND & MOBILE ENGINEER | CONTRACT, LAUNDRY DNA

04/2023 – 10/2023

Abuja, Nigeria

- Enhanced mobile applications by improving navigation and categorization of laundry services, increasing functionality by 30%.
- Integrated third-party APIs to expand application functionality and user experience.
- Improved app security and features, resulting in 20% increase in app usage within three months.
- Implemented new app features to facilitate swift user interaction, boosting app usage by over 20%.
- Resolved bugs in payment gateway to ensure seamless transactions and enhance user experience.

FULLSTACK & MOBILE ENGINEER,

INDEPENDENT NATIONAL ELECTORAL COMMISSION (INEC) - Intern [↗](#)

02/2022 – 07/2023

Abuja, Nigeria

- Developed Voter Enrollment Mobile Application, enhancing voter verification processes by 30%.
- Configured Bi-Modal Voters Registration System (BVAS) devices to ensure 100% election integrity.
- Conducted software testing on old and new BVAS devices, resulting in over 50% increase in application efficiency.
- Implemented custom Android OS for Continuous Voter Registration (CVR) and Voter's Identification Number (VIN), achieving over 50% voter registration.

BLOCKCHAIN ENGINEER, NIMEDIX ECOSYSTEM [↗](#)

07/2022 – 12/2022

Abuja, Nigeria

- Developed a basic smart contract by learning the basics of Rust Programming.
- Built with the NEAR Protocol.
- Acquired proper knowledge about Blockchain Technology and Decentralized systems.
- Developed software solution using agile methodologies for healthcare applications.
- Implemented testing protocols to ensure software quality and reliability for clients.

Education

B. TECH STATISTICS, FEDERAL UNIVERSITY OF TECHNOLOGY MINNA, NIGER STATE.

2023

Skills and Abilities

Languages & Frameworks

JavaScript (*Solidity, Node.js, Next.js, Express.js, React.js*), Python, Flutter & Dart, Reactnative, Rust, PHP & Laravel, Firebase, MongoDB, MySQL, PostgreSQL.

Practices

Fullstack Development, Mobile Application Development, Blockchain & AI Development, Technical Management.

Tools & Platforms

WordPress, Trello, Slack, AWS, Git, GitHub, REST API, Postman, Figma, Docker, Android Studio.

Soft Skills

Adaptability, Problem Solving, Ideation, Research, Written and Verbal Communication, Effective listening, Employee Relations, Team building.

Research Interests

Space Exploration/Astrophysics, AIOT & Embedded Systems, Blockchain.

Certifications

- | | | |
|--|--------------------------------|--|
| • LinkedIn Learning – Web Security, Databases, Full Stack Development, Javascript essentials | • Udemy - Laravel, JavaScript. | • Digital Nigeria and Microsoft – Software Development Fundamentals, Networking Fundamentals |
|--|--------------------------------|--|

Volunteer Experience

FAIL CONFERENCE

09/2022

- Coordinated with speakers, contributing to the success of an event attended by 50+ developers.

GOOGLE DEVELOPERS GROUP ABUJA

09/2022

- Developed community-building strategies for events with 500+ attendees respectively.
